Summary

I'm a full-stack developer with 5 years of coding experience and two (2) years in the professional industry.

I create UI Designs using Figma, then convert to web pages using HTML, CSS and Javascript. I was part of a team that built a web-based estate management system using React JS and Java. Lately, I am currently working on a transaction processing web-based application, that handles bulk payments using React and Laravel (PHP).

I also share some UI tutorial contents on YouTube. I love learning, teaching and playing football games.

Experience

Full-stack Software Engineer

TechvibesLtd

Mar 2018 - Present (2 years 3 months +)
